*The Legal Technology of Rights for Nature*

**12:30-14:00** | Lunch

Strategic meeting for future plan & next steps

## **Afternoon**

**14:00-15:30**

Peter Godfrey-Smith (University of Sydney) – *Later Stages, Objections, and Alternatives*

*Location : École normale supérieure, Salle Jaurès, 29 rue d'Ulm, 75005 Paris*

The first part of the lecture will complete, and summarize, my evolutionary account and the place of subjectivity within animal life. This will include a look at human consciousness, and later stages in the evolutionary story. The rest of the lecture will be concerned with possible objections, alternatives to my view, and my reasons for not following paths seen in other discussions (Dehaene, LeDoux, and others). I'll also look at radically inclusive views – biopsychism and panpsychism – and at rejections of the possibility of a gradualist account of the origin of subjective experience.

**15:30\*-17:30**

Michael Rescorla (UCLA) – *The State of the Ocean (Part 3) (15:30-17:30)*

*Location : École normale supérieure, Salle Assia Djébar, 29 rue d'Ulm, 75005 Paris*

*\* Michael Rescorla will likely delay his presentation by a few minutes to account for the end of Peter Godfrey-Smith's presentation.*
